

MERN Stack Training

Company: Sensation Software Solutions

Student Name: Gurvinder Singh

Training Duration: 6 Months

Days: 34

Objective of the Day

The objective of Day 34 was to integrate **Redux with the To-Do List application** and manage tasks globally.

Work Done on Day 34

The trainer guided us in:

- Moving task state from local state to Redux store
 - Managing add, update, and delete actions using reducers
-

Redux Integration

Example:

```
const tasks = useSelector(state => state.tasks);
```

Hands-on Practice

We implemented:

- Global task state
 - Cleaner component structure
 - Better data flow
-

Conclusion

Day 34 improved application architecture and made the To-Do List app **more maintainable and professional**.
