**MERN Stack Training**
**Company:** Sensation Software Solutions
**Student Name:** Gurvinder Singh
**Training Duration:** 6 Months
**Days:** 89

---

# Objective of the Day

The objective of **Day 89** was to implement **Add Task and Edit Task functionality** with image upload and preview support.

---

# Task Form Component

A reusable form component was designed with:

- Title input
- Description textarea
- Due date picker
- Image upload field

---

# Image Preview Implementation

Selected images were previewed instantly using browser APIs, improving user confidence.

---

# Edit Task Workflow

The Edit feature allowed:

- Updating task details

- Replacing or removing images
- Maintaining existing data integrity

---

# Validation and UX Enhancements

Client-side validation ensured clean data submission and better usability.

---

# Learning Outcome

- Multipart form handling in frontend
- Component reusability
- File preview logic

---

# Conclusion

Day 89 completed all **task creation and editing workflows**, making the system fully interactive.
